

# Capability Statement

Education | Events | Professional Training | Wildlife Management

Hands on Wildlife offers professional fauna survey and spotter catcher services for the construction and mining industry. Based in Townsville we are well positioned to service regional areas throughout Queensland. Fauna spotter/catcher services are a common requirement for most development and construction projects, in order to help protect and preserve wildlife during land clearing. Our extensive knowledge of natural habitats and wildlife handling ensures the animals are removed promptly and safely, minimising down time when wildlife is encountered on your worksite.

## PROFESSIONAL SERVICES

- Pre and post clearing fauna and habitat surveys and reports. Wildlife consultancy and management plans.
- Fauna spotter catcher services during clearing, including handling venomous snakes and communal nesting species.
- Assessment and safe relocation or transport to care for captured wildlife
- Construct and install alternative nest boxes and nesting sites if required
- Aquatic fauna spotter catcher services for dewatering projects
